

INDEX OVERVIEW

BIGI-SD is a rules-based index that tracks the performance of a subset of the stocks included in a broad and deep universe of Israeli and Israel-related companies, as defined by BIGI-TIM which is based on BlueStar's proprietary methodology and database. Components of BIGI-SD are weighted based on both market capitalization as well as each component's dividend yield. Index components are reviewed semi-annually for eligibility in June and December, and the weights are re-set accordingly. Companies which hold an initial public offering between regularly-scheduled annual reviews and meet certain criteria as described herein may enter the index on a "fast-track" basis.

BIGI-SD is calculated and maintained by Standard & Poor's based on a methodology developed by BlueStar. on a price, total return and net total return basis in real-time. The net total return index is disseminated in real-time via the CME Group, Inc (CME) and market data vendors every day the Israeli or U.S. equity markets are open, respectively. Real-time index values for the net total return index are available on Bloomberg by entering "BLSSDNTX INDEX <GO>", and end-of-day values are freely available on BlueStar's website, www.bluestarindexes.com, and/or through market data vendors.

Top Ten Index Constituents
